

LUTHER'S WORKS: AMERICAN EDITION, NEW SERIES

PROSPECTUS

A+D 2025

The New Series

Concordia Publishing House has undertaken a major project to present untranslated works of Martin Luther in English translation. Since 2009, Concordia has released nine of the proposed original twenty volumes, as well as the complete *Church Postil* in five volumes.

The original fifty-five volumes of *Luther's Works: American Edition* (LW or AE),¹ published by Concordia and Fortress Press between 1955 and 1986, offered a selection representing only about a third of Luther's works in the Latin and German of the standard Weimar edition (WA), not including the German Bible.² Therefore much of Luther remained inaccessible to English-speaking pastors, students, and laity.

The general editors of the original volumes, Jaroslav Pelikan and Helmut T. Lehmann, warned that "Luther's writings are not being translated in their entirety. Nor should they be."³ More than fifty years after the publication of the first volumes of the American edition, we judged that the time was opportune to reevaluate the selections made. Some genres of Luther's work were notably underrepresented. For example, only 178 of the more than 2,000 surviving sermons preached or written by Luther were included in the original American edition. Even taking into account the nearly 400 *Church* and *House Postil* sermons that have been separately translated and published,⁴ there remained a substantial deficit of Luther's preaching in English. Luther's theses for theological disputations are also far more extensive than the handful translated for the original American edition. The new series now provides a more balanced selection of Luther's activity.

An expansion of the American edition is also called for by the general decline in the knowledge of Luther's languages in American ecclesiastical and academic circles. Neither pastors nor scholars nor students outside a narrow range of specialization are as likely to understand Latin or German as they were fifty years ago. Thus few readers are able to approach the Weimar edition for further study. And although the translation of Luther into non-European languages continues to expand, the international position of English as a second and scholarly language makes an expanded English-language edition of Luther especially useful for scholars and theologians far beyond Anglo-American circles.

2 *D. Martin Luthers Werke: Kritische Gesamtausgabe* (Weimar: Hermann Böhlau Nachfolger, 1883–). The works of Luther in the WA and other editions are cataloged in Kurt Aland, *Hilfsbuch zum Lutherstudium*, 4th ed. (Bielefeld: Luther-Verlag, 1996).

3 Jaroslav Pelikan and Helmut T. Lehmann, "General Editors' Preface," *Luther's Works: American Edition*.

Concordia Publishing House has a distinguished history of publishing Luther's works. In addition to publishing the first thirty volumes of the original American edition, Concordia also produced the "St. Louis edition" of Luther's works,⁵ a conscientious revision of the eighteenth-century edition of Johann Georg Walch, presenting the whole available corpus of Luther's works translated (as necessary) into German. This labor won the respect even of the German scholars engaged in preparing the Weimar edition, and its translations still serve as a convenient reference for students of the Reformation. That tradition continues with Concordia's expansion of *Luther's Works* in English for the twenty-first century.

The Continuation of a Classic Series

The new series is an expansion of the existing American edition, not a replacement for it. Works already translated in the American edition will not, with rare exceptions, be retranslated. In most cases, the text of editions printed during Luther's lifetime as edited in the Weimar edition will serve as the basis for translation, with attention to variation from manuscript notes where both are available. For works first published posthumously, greater or primary attention will be accorded to the notes. The language of the translation will be contemporary standard English of a generally formal register, keeping in mind that Luther's German has a considerable range. Also, the translations will represent the sensibilities of the sixteenth century about concepts such as religion and gender, and not those of the twenty-first century.

We have selected texts for the extended edition with an eye both to the sixteenth century and to the present needs of the academy and church in consultation with a wide range of theologians, historians, and churchmen, keeping in mind especially the following considerations:

(1) A survey of citations in recent scholarly work on Luther has guided our selection of texts important to current research on Luther and Reformation Germany. Inevitably, scholarly interests have shifted and developed in new directions over the past half-century. Continuing debate over the origins and development of Luther's theology has moved in part toward texts not represented in the original American edition. Interest in the young Luther has been balanced by renewed attention to the mature Luther. Concern with isolating Luther's own voice has been complemented by recognition that Luther chose to do much of his later publication as the center of a team of Wittenberg theologians and editors. And attention to the development of Luther's thought has been supplemented by research on the reception of Luther's ideas—recognizing, e.g., that a 1520 German layman had not necessarily come to know Luther primarily through the early works that loom largest in modern Reformation courses.

(2) With the question of Luther's reception in mind, we have selected texts that were important and interesting to his contemporaries, as evident in the extent of their reprinting in the sixteenth-century press as surveyed by Benzing and the VD16. Our selections take into account not only printing during Luther's lifetime but also the republication of Luther's writings amid the controversies of the later sixteenth century.⁶

(3) We have compared our selection of texts with modern German and German/Latin selected editions of Luther, endeavoring to furnish English-speaking students of Luther with the full range of texts available for discussion to German students.⁷

5 *D. Martin Luthers Sämmtliche Schriften, herausgegeben von Dr. Joh. Georg Walch: neue revidierte Stereotypausgabe*, 23 vols. in 25 (St. Louis: Concordia, 1880–1910).

6 Josef Benzing, *Lutherbibliographie: Verzeichnis der gedruckten Schriften Martin Luthers bis zu dessen Tod* (Baden-Baden: Heitz, 1966); *Verzeichnis der im deutschen Sprachbereich erschienenen Drucke des XVI. Jahrhunderts: VD 16* (Stuttgart: Anton Hiersemann, 1983–2000).

7 *Martin Luther Studienausgabe*, ed. Hans-Ulrich Delius et al. (Berlin: Evangelische Verlagsanstalt, 1979–99); *Calwer Luther-Ausgabe*, ed. Wolfgang Metzger (Gütersloh: Gütersloher, 1964–85); *Luther Deutsch: Die Werke Martin Luthers in neuer Auswahl für die Gegenwart*, ed. Kurt Aland (Göttingen: Vandenhoeck & Ruprecht, 1957–90); *Martin Luther Ausgewählte Werke*, ed. H. H. Borcherdt and Georg Merz (Munich: Kaiser, 1948–65); *Luthers Werke in Auswahl*, ed. Otto Clemen (Berlin: de Gruyter, 1912–68).

(4) Finally, we have been mindful of the role Luther’s writings have played in the later theology and piety of the Lutheran Church. In addition to texts published and republished amid the controversies of the later sixteenth century, works such as Luther’s 1532 sermon *How Law and Gospel Are to Be Thoroughly Distinguished*, published in six editions in the sixteenth century and cited repeatedly by the nineteenth-century American Lutheran theologian C. F. W. Walther, appears here for the first time in an English collected edition.⁸

We are confident that the selection of texts will, in harmony with the original goals of the American edition, provide much that has proved and will prove its “importance for the faith, life, and history of the Christian church.”⁹

The general editors of the series are Dr. Christopher Boyd Brown of the Boston University School of Theology and Graduate School and the Rev. Dr. Benjamin T. G. Mayes of Concordia Theological Seminary, Fort Wayne, Indiana, and formerly editor for academic books at Concordia Publishing House. We have gathered a corps of qualified translators from universities, colleges, seminaries, and from among independent scholars and philologists, all sharing a common commitment to making Luther available to the modern reader. Annotations and introductions to the texts will be provided by the general editors or other scholars as appropriate. We invite qualified translators to consider translating with us.

Content of the Volumes

The new series is numbered as a continuation of the American edition, beginning with volume 56. The volumes are of the same size and format as the existing American edition, with comparable type, layout, and annotations. The volumes are hardcover, with heavy-duty Smythe-sewn binding and acid-free paper, yielding well-made books that will remain in serviceable condition for many decades.

Upon completion of the new series, a new index volume of the entire extended American edition will be published to replace the existing volume 55. A volume of cross-references to other German, Latin, and English editions of Luther’s works is being planned, including a complete aid for finding various publications of Luther’s sermons in English.

The twenty-eight volumes of the new series will be arranged in eleven divisions. Work on some divisions has already been completed and is so noted, as are those volumes with a firm release date. Those indicated as “forthcoming” will be released one volume per year from 2025 to the completion of work on this new series.

Early Works of Luther (1509–ca. 1521)

Two volumes

These volumes offer a supplement of early materials illustrating both Luther’s own theological development and his portrayal in print during the early years of the Indulgence Controversy, better equipping English readers to form judgments on the still-developing debates over Luther’s theology and its reception. Included are a selection of Luther’s early marginal annotations on patristic and medieval works, some early sermons important to the debate over the “Finnish” interpretation of Luther, and Luther’s sermon *On Three Kinds of Righteousness*, an important witness to the development of his theology. Luther’s *Sermon on Indulgence and Grace* was the printed text through which many Germans formed their first impressions of the Augustinian monk and professor, and it shows Luther addressing the theological concerns of the *Ninety-Five Theses* to a popular audience, as do a series of pastoral works from this early period.¹⁰ Luther’s exchange with the papal theologian Sylvester Prierias is also presented, as well as Luther’s defense of his thirteenth Leipzig thesis on the power of the papacy.

Luther’s Disputations

Two Volumes

As a professor of theology in a late medieval university, Luther was a public disputant throughout a career in which the *Ninety-Five Theses on Indulgences* was only a small part. The disputations are witnesses to the development of Luther’s early theology and provide a unique opportunity to trace both continuity and change across the span of Luther’s career as a doctor of theology. In them, one sees how Luther continued to apply and to transform his scholastic theological training in dealing systematically with topics central both to the Reformation and to classic Trinitarian theology. They also attest to the depth as well as to the limits

of Luther's collaboration with Melanchthon in the last years of Luther's life. The original American edition offered eight of Luther's disputations. The new series offers nearly all of Luther's remaining disputations, with theses and an edited form of the disputations themselves when possible. Also included in volume 72 is a related text, Luther's *Dialectica* (ca. 1540), a treatment of the use of logic in theology.

Luther on the Psalms

Three Volumes

The Psalms stood close to the center of Luther's piety and exegetical interest throughout his life as a monk, professor, and reformer. The new series will provide a complete translation of the *Operationes in Psalmos* as well as Luther's 1532–33 lectures on the Psalms of Degrees, containing material of great theological interest. Psalm 72 from the first Psalms lectures will be presented on the basis of the correctly ordered text of WA 55. The volumes also will reflect Luther's concern for lay use of the Psalter, with a selection of sermons on psalm texts, prefaces to German Psalter editions, and his summaries of all 150 Psalms.

Also included are the portions of his influential preface to Daniel that were omitted in the original American edition. On New Testament texts, his sermons and annotations on Matthew from 1537–40 and sermons on John 17–20 are included.

Luther's Prefaces

Two Volumes

Luther complained in 1537 that he had become a professional “writer of prefaces” (LW 60:136). His activity in this field reveals him as a patron of the works of others and as a commentator on a variety of subjects throughout his career. The prefaces are an especially rich source of Luther’s reflections on history—both the span of church history and the events of his own day—and on contemporary religious movements, including Islam. The original American edition included three prefaces in addition to the hymnal prefaces in volume 53. The new series includes virtually all the rest.

Readers will find not only sermons edited for sixteenth-century publication by Luther or others but also translations from the notes of Georg Rörer and other scribes.

Contemporary Biography

One Volume

The biographical volume in the new series illustrates the early appropriation and interpretation of Luther's life. Along with Luther's own reflections on his career from 1533, the selection includes the contemporary report on Luther's death, Bugenhagen's funeral sermon, and Melanchthon's appraisal of Luther's life from the second Latin volume of the Wittenberg edition of Luther's works. Especially important to biographical study as well as to later Lutheran piety are Johannes Mathesius' sermons on Luther's life, based partly on Mathesius' own eyewitness experience as a student in Wittenberg and as a boarder at Luther's table. It is fitting that Concordia Publishing House, which printed Mathesius' *Life of Luther* in numerous nineteenth-century German printings, should offer an English translation.

Church Postil

Five Volumes

From 1525 to 1529, some twenty-five editions of Luther's postil were published while in the next half decade, the number rose to more than fifty. The five volumes of the *Church Postil* that are included with the new series of the American edition represent the final edition of the work edited by Luther himself and

by Caspar Cruciger Sr. with Luther's approval. Included in these volumes are Luther's several prefaces and additional sermons that while not officially part of the *Church Postil* have come to be closely associated with the work as a whole.

House Postil

Three Volumes

After the final version of Luther's *Church Postil* appeared in print at the end of 1543, a new postil on the Gospels of the church year, edited by Veit Dietrich, was published in 1544. This was the *House Postil*, sermons which, according to Dietrich, Luther had preached at home to family and servants when he was too sick and weak to preach in church.¹² A completely different edition was published in 1559 by Andreas Poach on the basis of notes taken by Georg Rörer.¹³ Our series will feature a new translation, complete for the first time, of the 1544 Dietrich edition, which Luther approved and to which he supplied a preface.
